If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

CLAIMS

What is claimed is:

1. A compound comprising hematin derivatized with one or more non-proteinaceous amphipathic groups.
- 5 2. The compound of Claim 1, wherein said compound is soluble in solutions ranging from pH 1 to pH 12.
3. The compound of Claim 1, wherein the amphipathic group is a substituted or unsubstituted polyalkylene glycol.
4. The compound of Claim 3, wherein the polyalkylene glycol is substituted or
10 unsubstituted polyethylene glycol.
5. The compound of Claim 4, wherein polyethylene glycol groups have a molecular weight of about 400 to about 100,000.
6. A method of polymerizing an aromatic monomer, comprising combining an aromatic monomer with a hematin catalyst, wherein the hematin catalyst has
15 been derivatized with one or more non-proteinaceous amphipathic groups.
7. The method of Claim 6, further comprising combining a peroxide initiator with the aromatic monomer and the derivatized hematin.
8. The method of Claim 7, further comprising a template, wherein the aromatic monomer aligns along said template and polymerizes to form a complex
20 comprising the polymerized aromatic monomer and the template.
